FIVE-YEAR CO-OPERATIVE

PLAN FOR POLLTRY WORK
Under one five years' co-operative program for poultry work the first year would be devoted to "Selection." The idea being the gradual elimination of non-productive birds, shelts, pullets, hens and males. Selection is placed first for two main reasons: (1) Because in order to put money into his poultry, whether for stock or experiment he must be shown that money can be made out of poultry, if properly handled, which cannot be done by keeping mongred flocks, weak or disease of money into his poultry, whether for stock are gradually flower.

If the first four years' work has done by keeping mongred flocks, weak or disease of this program will find the poultry house.

If the first four years' work has done by keeping mongred flocks, weak or disease or birds of all ages housed moley in the first flow years work has done by keeping mongred flocks, weak or disease or birds of all ages housed moley in the first flower of the poultry house.

If the first flow years' work has done by keeping mongred flocks, weak or disease or birds of all ages housed moley than program will find the poultry house is kept as it industry well established and so much in a productive head and so much in the first flower will find the poultry house is kept as it industry well established and so much in a productive head and so much in the first flower will find the poultry house is kept as it industry well established and so much in the first flower will find the poultry house is kept as it industry well established and so much in the first flower will be an an an analysis of the first will be decided the their golden were constituted that move the first of the molectary that the mocestary knowledge for storing flower were and black in a clean, dry place for storing flower were flower will soid. Never permit the twool to lie upon the ground not stored their colonial flower on an intermal land one storing the wool to lie upon the ground not stored their colonial flower on an intermal land flower w ndiscriminately. (2) Because, without selection, good breeding is imposible.

The second year, having made a careful selection of the flocks during the first

ODORS IN THE POULTRY HOUSE.

If the poultry house is kept as it should be the owner and the guests should be able to go into it at any time without having to hold their noses that. Of course, it requires good management, on a large stock farm owned by his upole. on a large stock farm owned by his uncle near Muscatine, Ia., where he remained for only more profitable but essential.

Of course, it requires good management and thorough cleaning to have the pouse clean is to difficult as may be supposed.

Training apple trees by pruning so difficult as may be supposed.

The care of growing stock, oarly better of the speciars of the ordered by several by his more profitable but essential.

The care of growing stock, oarly better of growing stock, oarly better of growing stock, oarly better of the speciars and decreases the cost of spraying and also increases the cost of spraying and ploking and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the speciars and decreases the yield, according to the first over the special set of the special s

bearance.

A survey of Wayne county shows that Ealdwin and Greening irees fifteen years old actually produced less fruit in three years that ten-year-old trees of the same variety have produced in the Cornell orchard in one year. In both cases the orchard in one year. In both cases the orchards are well cared for, the difference being that the trees in the Cornell, orchards received life prunning.

The difference in the face of the fact that the soil in Wayne county is gentally yield at least twice as much as one ten years old, is evidence that the pruning decreases the yield.

It's Nerve Force from Nuxated Iron

that helps make STRONG, MAGNET-IC, FORCEFUL MEN, who make their over-mastering presence felt the

moment they enter a room. NUXATED IRON

contains the principal chemical constituont of active living nerve force in a form
which most nearly resembles that in the
brain and nerve ceils of man. It also
contains organic fron like the iron in
your bleed and like the iron in spinach,
lentils and applen. Organic fron enriches
the blood and pienty of rich red blood
means more nerve force, so that Nuxated
fron not only feeds what might be termed
artificial nerve force to the nerve ceils,
but it stimulates the blood to manufacture a greatly increased supply of new
nerve force. If you are weak, nervous
or run-down, get a bottle of Nuxaled
fron today, and if within two weeks
time you do not feel that it has increased
your nerve force and made you cei better and stronger in every way, your
money will be refunded. Sold by all
drugsfets.

NORWICH SAILOR DROWNED FROM CUTTER PEQUOT

Returning to New London after a trip o New York, Coast Guard Cutter Pe-

to New York, Coast Guard Cutter Pequot brought sad tidings for the family in Norwich of Thomas Hargraves, a member of her crew. He was drowned last Wednesday at Nepeague harbor, Long Island, the day following departure of the Pequot from New London. His body has not yet bean recovered. The Pequot rarely stops at this Long Island port which is near Promised Land, but entered there Wednesday morning a little before S o'clock. As she approached the landing place it was seen that her surf host would strike the wharf and Hargraves started to pull it that her sure hoat would strike the wharf and Hargrayes started to pull it inboard. In some manner he lost his hold and fell overboard. He was a good swimmer, it is said, but he wore heave hip rubber boots and these filled with water and bore him down struggling, within sight of his shipmates who were fractively because the

within sight of his shipmates who were frantically lowering the surf boat. This was in the water two minutes after the cry of "Man overboard," rang out, but even this quick work was not in time to save the heavily-clothed seaman.

The Pequat remained in the harbor all of that day dragging for the body, but without success and was then obliged to continue to New York. Parents of Hargraves, who reside on R. F. D. route No. 8 out of Norwich, were notified of the loss of their son and they visited the Pecnot on Sunday at her dook at New London and were given the details by Cantain J. P. Gray, master of the craft, and took Dossession of their son's effects.

Hargraves was 23 years old, unmar-led, and had been in the service since ast July, rating as a scaman second lass. During all of his service he had en attached to the Pequot and he was NEW PRICES ON FORD CARS
